

Table 2.02 Which Fields Are Gaining and Which Are Losing as a Share of Each Country's US-Bound Students?

¹ Each cell is the percentage-point change in percentage points, in the share of that country's U.S.-bound international students enrolled in the field, from the first to the most recent year available (2010–2025 for most countries; 2012 for Iran, 2018 for Bangladesh). Column headings are abbreviated: Math/Comp. is mathematics and computer science, Phys./Life is physical and life sciences, Business is business and management, Fine Arts is fine and applied arts, Health is health professions, and Social Sci. is social sciences. Red marks fields gaining share, blue marks fields losing it. Columns are ordered from the field gaining most across countries to the field losing most. Countries are ordered by total international enrollment. Largest first.

Data from IIE, "Fields of Study of Students from Selected Places of Origin," Open Doors, 2025.
Chart by Freeman, Johnston, and Amy Zerkow, Stanford University.
